WRIR just updated its internet stream last week. Now you can listen to us on the computer at a bitrate of 96kbps and in stereo, so the sound is even better online than it is on the air. And we can accommodate twice as many online listeners as previously. We webcast 24 hours a day, so check out WRIR's webstream any old time. Here's the link: <http://wrir.serverroom.us:7722/wrir.m3u>. Or you can go to the website (www.wrir.org) and simply click and listen.
